
ACCESS
Task / chat entry
CLI · web console · SDK · A2A
Direct operation entry
REST · stdio-MCP
RUNTIME
Workspace & channel
task queue · memory
Task engine & harness
goal · loop · prompt
GOVERNANCE
Tool catalog
discovery, not a permission
Dispatch gate
scope · policy
S & P & G & B
Write admission
card · 180 s
H ∩ B ∩ P ∩ R
CONTEXT
Production context
line–product–recipe–run
Scene & semantics
signals · guards · units
SERVICES
route handlers select a service adapter
DAQ edge
run-tagged
Write (DCW)
readback
MES
order history
Analysis
reports
FIELD I/O
Configured protocol drivers
OPC UA · MQTT · Modbus
Plant or simulator
cast film · annealing
Service-owned records
own record types
Task runtime
task journal
approval decisions
Write control
receipts (3 grades)
write audit · refusals
DAQ
run-tagged samples
Analysis
summaries
Recipe store
versions
Linked by actor and run IDs where a route supplies them.
A receipt is not a process observation.
Independent PLC / SIS protection remains external.
