RECORDS
Task / chat surfaces
CLI · web console · SDK
A2A · MCP task methods
Task runtime
workspace · engine · harness
Direct surfaces
REST · stdio-MCP operations
no task · no harness turn
Shared operation gate
catalog: discovery ≠ permission
scope · channel policy
grant · binding · ownership
S ∧ P ∧ G ∧ B at every call
write: approval card · 180 s
H ∩ B ∩ P ∩ R admission
step · interval · hold checks
Shared handlers
read: DAQ · MES · retrieval
write: DCW · recipe
semantic nodes · drivers
live state resolved at call
receipt graded
observation separate
Task records
task journal
approvals
receipt
observation
Operation records
receipt · readback
observation
no task edge
Production context
line–product–recipe–run · scene blueprint · semantic nodes
grounds prompts and live checks;
never grants authority
Services
DAQ edge · DCW · MES · analysis · models
Field I/O
OPC UA · MQTT · Modbus → plant or simulator
