ACCESS
CLI · terminal workbench · web console · SDK · REST · MCP · A2A
all entry surfaces converge on one runtime entry
TEAM
Workspace → channel
team · task queue
memory · mailbox
Task engine
goal · loop · pipeline
dispatch · verdicts
Harness adapters
engine registry
one prompt assembler
GUARD
Tool catalog
role · channel policy
profile · binding
one catalog per member
Dispatch gate on every call
scope · selection
profile · duty
grant · ownership
Approval · choke
manual: pending card
expiry denies
one ordered path
SCENE
Production context
line–product–recipe–run
Scene blueprint
signals · objectives · guards
Semantic nodes
DAQ/DCW · units · ranges
I/O SERVICE
DAQ edge runtime
per-node cadence
DCW controller
limits · write audit
Analysis
diagnostics · retrieval
Models
models · optimization
Drivers → plant / simulator · independent PLC / SIS protection
Evidence ledger
written by every band
task and team journal
receipts, three grades
write audit and refusals
DAQ time-series history
exploration summaries
recipe versions
records linked by actor and production context; each route keeps its own record type
