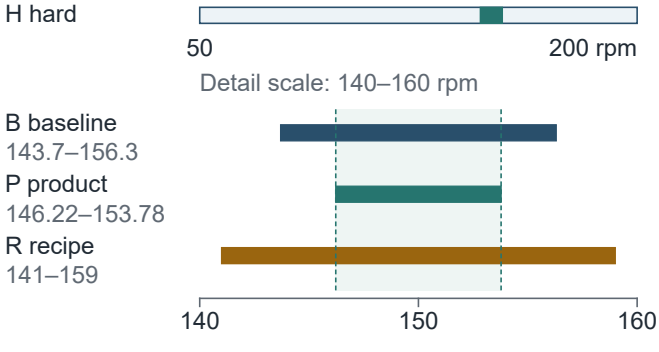
a Source-aware admission

I = H ∩ B ∩ P ∩ R = [146.22,153.78] rpm



b Approval and recheck

Symbolic schematic; no measured values

Line / recipe binding + active run

Parameter	Current	Proposed
Control u	u(now)	**u(next)**

Reason / hypothesis + execution context

Approve | **Decline**

Approve → recheck grants, binding and context

Then admission → dispatch; failure → no dispatch

Decline → no dispatch; decision is recorded
