Integration surfaces: SDK · REST · MCP · agent-to-agent · CLI · console
Scene configuration and scope: line · product · recipe · run · devices / signal maps / objectives
candidate to selected route
Agent collaboration
Channels · teams · tasks
Shared memory · replaceable strategies
Queries analysis / receives evidence
Operational workflows
Bounded node exploration
Recipe trial / apply
Scoped route execution
Semantic plant I/O
DAQ read · DCW control
Signal maps + units
Protocol drivers
Analysis and models
DAQ diagnostics · RAG
Datasets · model services
Evidence returned to strategy
u
y
Linked task and production evidence
Node journals / summaries · batch receipts · DAQ history · recipe versions
Plant / simulator
Local protection
