TASK-TO-OPERATION FLOW
Task + scene context
Line · product · recipe · run
Collaborative analysis
Team + replaceable strategy
DAQ / RAG / model evidence
Candidate operation
Target + proposed settings
A Bounded node exploration
Journal opens only after a successful, value-changing write.
Bind node
Read baseline
Scoped write
DCW action
Observe
Wait + query DAQ
Persist
Node journal + summary
B Recipe trial and production workflow
Trial receipts precede caller observation and any recipe update.
Prepare trial
Candidate override
Scoped dispatch
Batch + param receipts
Observe
Caller queries DAQ
Recipe action
Update / apply rollback
Retained route-specific evidence
Task context · receipts · DAQ observations · node journals / summaries · recipe decisions
